- Electrical & Instrumentation Projects
- Cathodic Protection Projects
- Industrial Maintenance & Shutdown Services
- Steel Mill & Refractory Services
- Transportation Services
- Rental Equipment Services

*An ISO Certified Company*

# EXCELLENCE IN SERVICE

## INTRODUCTION

Established in 2008, Power Zone Contracting Co (PZC) has evolved from its entrepreneurial journey to become the cornerstone of the Power Zone Group, a dynamic conglomerate comprising multiple companies in the Kingdom of Saudi Arabia and Kingdom of Bahrain.

Power Zone serves a wide range of sectors, including Construction, Energy, Chemicals, Manufacturing, Mining & Metals and Infrastructure Development. Power Zone's vision of "Concept to Commissioning" encapsulates the comprehensive journey of bringing an idea or project from inception to full operation. By leveraging innovation, collaboration, and expertise, we aim to guide projects from their initial conceptualization to successful commissioning, delivering exceptional results that meet or exceed client expectations.

Power Zone has consistently delivered exceptional results across all its endeavors. With a dedicated team of professionals and a customercentric approach, we strive to exceed expectations and drive positive change in the industries we serve. Our continued growth and success are a testament to our unwavering dedication to quality, reliability, and integrity in everything we do.

### VISION

To build a sustainable future through pioneering services, delivering exceptional quality and value in every project.

### MISSION

To deliver top-tier services that optimize performance, reduce environmental impact, and exceed customer expectations.

## OUR TEAM

Our professional team at Power Zone Group embodies expertise, dedication, and a commitment to excellence. With years of collective experience across diverse industries, our team members bring unparalleled knowledge and skill to every project we undertake. From engineers to adept technicians and astute management professionals, each member of our team is dedicated to delivering superior results and exceeding client expectations. Together, the Team ensures quality services broadly in the following key areas, that drive the success of projects embarked on Power Zone platform.

### ■ **Competent & Qualified Personnel**

Power Zone boasts skilled and experienced workforce with project oriented & technically qualified supervisory staff to handle Turnkey Projects and multi-discipline retrofit and maintenance works.

### ■ **Quick Mobilization**

Proximity to clients' locations enables Power Zone to provide quick mobilization of work-force at any time for any volume.

### ■ **Availability of Manpower Pool**

Power Zone maintains a large data base of manpower suppliers to cater the long-term and short-term contracts through a well-connected network of overseas manpower consultants. With this arrangement and internal reserves, Power Zone has become a leading player in its class for manpower requirement.

### ■ **Supply Chain Management**

#### ✓ **Procurement**

Cost, Quality and schedules are the driving force for our highly qualified procurement Team that supports the projects from bidding stage to completion. The sourcing of right project material, equipment and services at the right time is carried out through our extensive supplier network based inside and outside the Kingdom.

#### ✓ **Material Management**

Our team of professionals, located regionally, ensure that the best quality and the optimum quantity of materials are made available to projects in a timely and cost effective manner.

#### ✓ **Logistics**

Power Zone has proven experience in providing logistic support to all our projects that is backed by a large fleet of vehicles and equipment. The logistic planning, survey of sites , arranging haulage & heavy lifts and reliable transport & equipment help in meeting the needs of all large and small projects.

# TURNKEY CONSTRUCTION PROJECTS

Power Zone Group offers specialized industrial construction services tailored to meet the unique needs of diverse sectors. From Greenfield Projects to Plant Expansions and Plant Upgrades, we provide turnkey construction services for a range of industrial facilities. From Concept to Completion range, we prioritize client satisfaction, ensuring projects are completed on time and within budget. Areas of expertise includes.

- ✓ Mechanical Piping & Process Equipment Works
- ✓ Design & Engineering
- ✓ Site Development Works
- ✓ Concrete & Steel Structural Works
- ✓ Electrical Distribution ( HV. MV and LV ) Works
- ✓ Process Instrumentation & Automation Works
- ✓ Process Control Systems including DCS, PLC Works

# CROSS COUNTRY PIPELINE PROJECTS

Power Zone specializes in cross-country pipeline projects, offering end-to-end solutions. Our expertise spans in cross-country pipeline projects, offering end-to-end solutions for efficient and reliable resource transportation. Our expertise spans as below:

- ✓ Pipeline Design & Engineering
- ✓ Pipeline Installation
- ✓ Pipeline Testing & Commissioning
- ✓ Pipeline Integrity management
- ✓ Pumping Stations
- ✓ Pipeline Testing & Commissioning
- ✓ SCADA System Installation

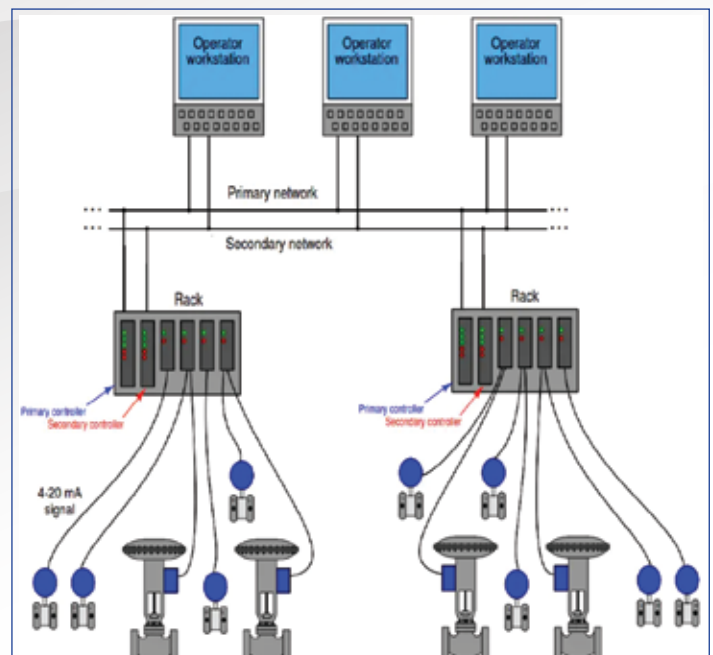

With a focus on quality, safety, and environmental stewardship, we ensure seamless operations across vast distances and challenging terrains, delivering superior results that exceed client expectations.

## ELECTRICAL & INSTRUMENTATION PROJECTS

Power Zone specializes in providing comprehensive electrical, instrumentation and automation services to our clients across various industries. Our expertise includes the installation, maintenance, and upgrading of electrical, instrumentation and automation systems, ensuring optimal performance and adherence to the highest safety standards. We integrate cutting-edge automation technologies, such as programmable logic controllers (PLCs), human-machine interfaces (HMIs), and sophisticated industrial control systems, to streamline operations, enhance precision, and significantly reduce downtime. At Power Zone, driving efficiency and sustainability, leveraging the latest advancements to deliver robust, reliable, and innovative solutions. Our dedicated team of professionals ensures that every project, from initial design to final implementation, meets the highest standards of quality and excellence.

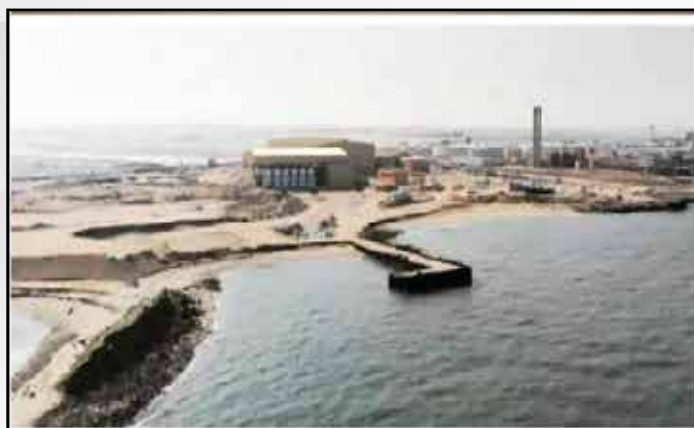

# CATHODIC PROTECTION PROJECTS

Power Zone delivers innovative Cathodic Protection projects, safeguarding critical assets like pipelines, steel structures and other critical infrastructure from corrosion. Our comprehensive approach encompasses the following services for Onshore & Offshore facilities:

- ✓ Design & Detail Engineering Works
- ✓ Supply & Installation Works
- ✓ Testing & Commissioning Works
- ✓ Ongoing Monitoring of Cathodic Protection Systems

Utilizing advanced technologies and industry bestpractices, we ensure the long-term integrity and reliability of Pipelines, Tanks, and other assets, minimizing the risk of corrosion-related failures and maximizing operational efficiency.

With a steadfast commitment to quality and safety, cathodic protection solutions that provide peace of mind and lasting value to our clients.

Rehabilitation Of Cathodic Protection System  
For  
Sea-water Cooling 1 &2, Canal-3 Siphon(North & South)

Power & Utility Company (Marafiq), Jubail Industrial City, KSA

Design, Engineering, Supply & Installation of Cathodic Protection System  
For  
Al Khafji New City Feeder Water Transmission Pipeline

Saline Water Conversion Corporation (SWCC), Al Khafji, KSA

## INDUSTRIAL MAINTENANCE & SHUTDOWN SERVICES

Power Zone specializes in industrial maintenance and shutdown services, ensuring seamless operations and optimal performance of critical equipment in petrochemical and O&G industry. Our expert team delivers tailored solutions, including preventive maintenance, predictive maintenance, and efficient shutdown planning and execution. Broadly, our scope of activities include providing:

### MAINTENANCE SERVICES

Power Zone specializes in the following plant maintenance services for oil & gas, petrochemical, power & utilities and metallurgical industries:

- Short- and long-term maintenance services in all Disciplines (Civil, Mechanical and E&I)
- Modification and repair of static equipment
- Selective upgrading and de-bottlenecking mechanical works
- Readily available services include:-

- ✓ High Pressure Water Jet Cleaning
- ✓ CO<sub>2</sub> Dry Ice Blast Cleaning
- ✓ Mechanical Cleaning
- ✓ Mechanical / Hydro Jet Cleaning
- ✓ Heat Exchanger Maintenance
- ✓ Column Revamps
- ✓ Pipelines & Tank Maintenance
- ✓ Bottom Change Out and Repairs
- ✓ Internal Modification & Repair Services for Columns

### SHUTDOWN SERVICES

#### ■ Human Resources Services

This comprises the supply of highly skilled, skilled and semi-skilled manpower for:

- ✓ Plant Turnaround and shutdown activities
- ✓ Plant maintenance activities
- ✓ Support services for plant construction
- ✓ Product handling
- ✓ Administrative and clerical staff services

#### ■ Availability of Manpower pool

The division's ability to serve clients requirements with efficient yet cost effective manpower services through a well-connected network of overseas manpower consultants and internal reserves, makes PZC a leading player in its class

## ■ Quick Mobilization

Proximity to client's locations enables the division to provide quick mobilization of work-force at any time for any volume.

## ■ Package Services

Providing core maintenance and support services such as scaffolding, blasting, fibre glassing, heavy lifting etc. under one roof gives PZC an edge over the competition.

## ■ Total Supply Chain Management

This comprises the supply of highly skilled ,skilled and semi- skilled manpower for:

### ✓ Procurement

Cost, Quality and schedules are the driving force for our highly qualified procurement. Team that supports the projects from bidding stage to completion. The sourcing of right project material, equipment and services at the right time is carried out through our extensive supplier Network based inside and outside the Kingdom.

### ✓ Material Management

Our team of professionals, located regionally, ensure that the best quality and the optimum quantity of materials are made available to projects in a timely and cost effective manner.

### ✓ Logistics

PZC Transport and equipment section has proven experience in providing logistic support to all our projects that is backed by a large fleet of vehicles and equipment. The logistic Planning, survey of sites, arranging haulage & heavy lifts and reliable transport & equipment help in meeting the needs of all large and small projects.

# INDUSTRIAL CATALYST SERVICES

Power Zone provides catalyst changeout services for chemical, petrochemical, and oil and gas refining companies in the world (In KSA). Our catalyst services provide Clients with a comprehensive package of catalyst handling technologies. in all types of reactors, reformers and processes.

**Our range of services include:**

- ✓ Catalyst Screening
- ✓ Inert Entry (N<sub>2</sub>) for Catalyst Loading / Unloading Activities & normal atmospheric conditions.
- ✓ EO/ Tubular Reactor Catalyst Change.
- ✓ FCC Catalyst Vacuuming.
- ✓ Reformers / Platformers Catalyst Change Outs.

# CO<sub>2</sub> (DRY ICE) BLASTING SERVICES

CO<sub>2</sub> Dry Ice Blasting is highly effective and popular now a days in each Industrial Sector. This process drastically reduces cleaning time and provides a detailed cleaning that allows faster reassembly without drying time and significantly reduces cost.

## Wide Industrial Sectors - Dry Ice Blasting Applications:

- ✓ Rotary / Static Machinery – Industrial Plants (Chemical/Power/Oil-Gas)
- ✓ Food & Beverage
- ✓ Construction Industry
- ✓ Plastics- Composites
- ✓ Electrical
- ✓ Automotive
- ✓ Rubbers & Tyres Industry
- ✓ Onshore / Offshore Facilities
- ✓ Reactors
- ✓ Refineries
- ✓ Restoration & Remediation
- ✓ Construction Industry
- ✓ Foundry
- ✓ Aeronautics

## Benefits Of Dry Ice Blasting Of Electrical Equipment

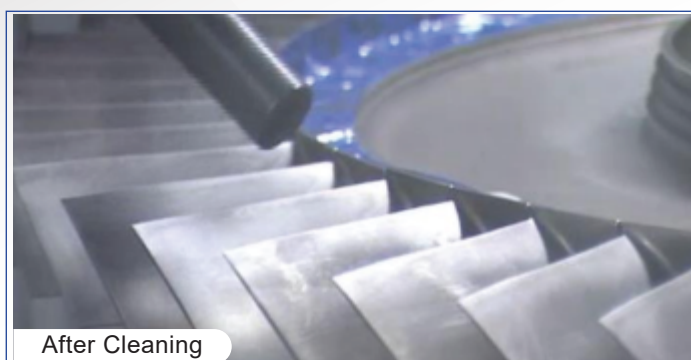

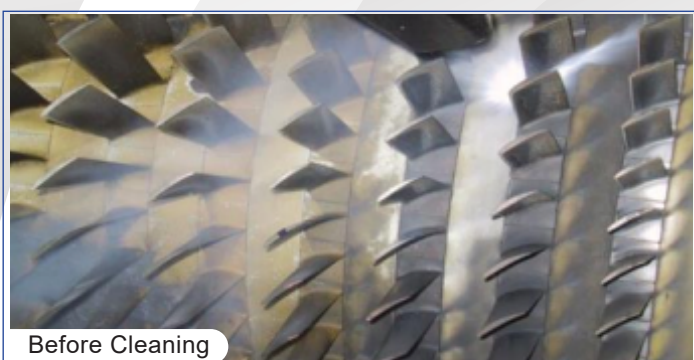

Dry ice cleaning is a process that can be safely used on almost all electrical appliances. It does not cause damage to stator slots, turbine blades or other sensitive components. Popular applications include hydropower generation equipment (stators and rotors), transformers, substations, gas turbine generators, insulators, motor control centers, power distribution panels, and system components.

## DRY ICE COMPARISON WITH OTHER CONVENTIONAL METHOD

Blast Cleaning Comparison					
Blasting/ Cleaning Technique	Secondary Waste	Abrasive	Toxic	Electrically Conductive	Performance Comparison
Dry Ice	No	No	No	No	Excellent
Sand	Yes	Yes	No	No	OK
Soda	Yes	Yes	No	No	OK
Cleaning with Sodium bicarbonate	Yes	Yes	No	No	Good
Steam / Water	No	No	No	Yes	Poor
Solvents	Yes	No	Yes	Yes	Limited

## Generators & Turbines

Dry ice blasting cleans electrical generating equipment, turbines and thus reduces downtime from overheating. The process also allows units to be cleaned on-site without damaging cables and insulation.

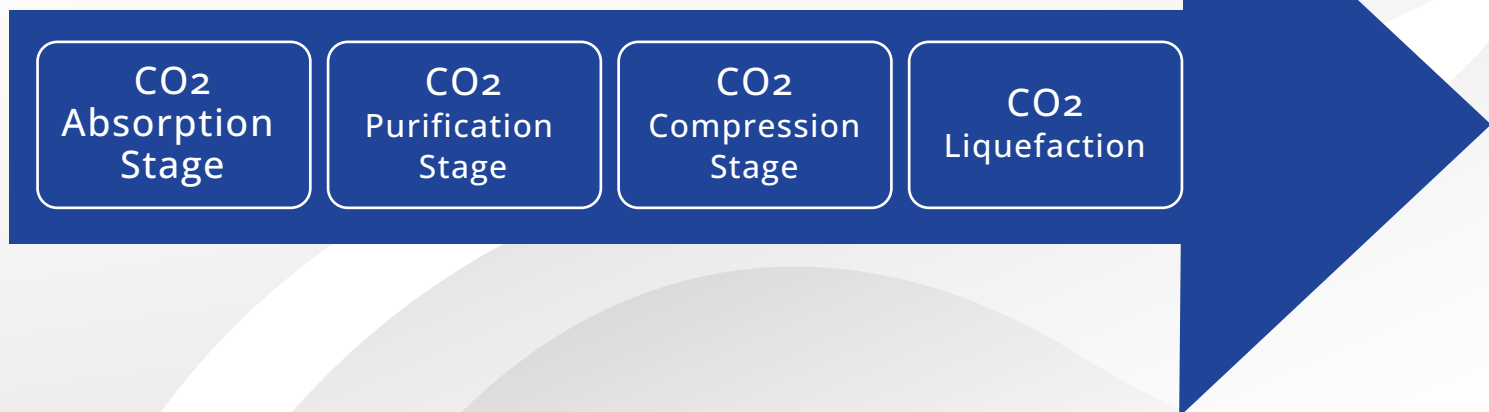

## CARBON CAPTURE UTILISATION STORAGE (CCUS)

- ✓ Design and Engineering
- ✓ Supply and Logistics
- ✓ Installation
- ✓ Testing and commissioning

### Carbon Capture Utilization Storage Process

Carbon capture is a process of trapping carbon dioxide emissions from various industrial facilities, preventing them from entering in atmosphere. It involves capturing CO<sub>2</sub>, processing, transporting it, storing it underground to mitigate climate change or by converting in Dry Ice Form to Utilize it in various Industrial applications to reduce greenhouse footprint and its impact on the environment.

### Stages of CCUS to CO<sub>2</sub> Gas / Dry Ice

### Production of CO<sub>2</sub> Dry Ice: An Ecofriendly Raw Material for Blasting/Cleaning

# RETROFIT SOLUTION SERVICES

Power Zone offers industrial retrofit solutions to customers, providing cutting-edge upgrades to existing industrial facilities and equipment. These solutions are designed to enhance efficiency, productivity, and sustainability while ensuring compliance with the latest industry standards. The retrofit services include upgrading machinery, improving energy management systems, and implementing automation and control systems.

Power Zone has partnered with leading Industrial OEM's like ABB, DODGE, EA-TECHNOLOGY to offer retrofit solution to their following products. Power Zone's expertise ensures that each retrofit project is tailored to the specific needs of the customer, delivering customized solutions that drive innovation and competitive advantage in the industrial sector.

## Approved Channel Partner

# STEEL MILL & REFRACTORY SERVICES

Steel Mill Services provided by Power Zone Group are tailored solutions designed to enhance efficiency and productivity in steel manufacturing. Our comprehensive offerings mainly include the following services:

- ✔ **By-Products Processing / Blending-Iron Oxide & Steel Slag**
- ✔ **Refractory-Wrecking Services**
- ✔ **Metal Recovery**
- ✔ **Scrap Management**
- ✔ **Refractory used Material Recycling & Utilization**
- ✔ **Logistical Support for By Products & used Steel Mill Materials**

Leveraging advanced technology and industry expertise, we optimize processes to maximize yield and minimize waste. With a commitment to excellence, we ensure seamless operations and drive success in the steel industry through innovation and continuous improvement.

Whether it's providing on-site support, maintenance services, or customized solutions, we are committed to delivering excellence and driving success in the steel industry. With a focus on innovation and continuous improvement, Power Zone Group stands as a trusted partner in advancing the capabilities and competitiveness of steel mills worldwide.

# STEEL MILL BY-PRODUCTS PROCESSING

Power Zone Contracting Co. (PZC) has been awarded another long-term contract with Hadeed/SABIC Blending, recognizing the company's expertise in recycling waste products and transforming them into valuable, marketable materials. PZC has a long-standing history of developing innovative recycling processes, creating a Saudi Arabian market for these by-products, which results in significant cost savings and environmental benefits.

PZC operates its own state-of-the-art Computerized Blending Plant, enabling the company to meet the demands of a competitive market. These blended by-products are highly sought after by the cement industry, and Hadeed benefits by selling the converted waste materials to their customers. Additionally, this process frees up stockpile areas for Hadeed, allowing for further operational efficiencies and added value.

This entire operation is managed by PZC's team of highly trained personnel, with over 25 years of experience in the field. The project operates 24/7 with full equipment support, ensuring continuous and efficient recycling and blending services. The blended materials are used in the cement industry as clinker, with certain elements in the material contributing to significant cost savings for cement manufacturers.

PZC also provides transportation services for these blended materials to the cement industry, reducing costs and improving operational efficiency. The company holds all necessary environmental permits from Saudi Arabian government authorities, ensuring full compliance for the handling, processing, and transportation of solid waste.

# WRECKING SERVICES

Power Zone Contracting Co. (PZC) has secured a prestigious long-term contract with Hadeed Steel Plant, a subsidiary of SABIC, for a duration of seven years. Under this agreement, PZC has deployed five state-of-the-art robotic remote-controlled mini excavators to deliver continuous 24/7 service. The contract entails comprehensive operational and maintenance services, ensuring seamless performance every day of the week. PZC's highly skilled team of maintenance and operational personnel play a pivotal role in the success of this project, offering their expertise and commitment to excellence in every aspect of the contract.

Power Zone Contracting Co. (PZC) specializes in providing advanced industrial services, including the wrecking of ladle furnaces and tundish vessels at Hadeed Steel Plant, part of SABIC. These services involve the precise removal of waste refractory materials, ensuring that the vessels are thoroughly cleared for the installation of new refractory bricks. By using cutting-edge technology and highly trained personnel, PZC ensures that this critical process is carried out efficiently and safely, supporting

Hadeed's operations with reliability and expertise. This service is integral to maintaining the optimal performance and longevity of the plant's furnaces and vessels.

Power Zone Contracting Co. (PZC) also provides specialized cleaning services for Hadeed Steel Plant, utilizing advanced machinery to remove stuck metal from various equipment and locations within the plant as required. This additional service ensures that Hadeed's operations remain smooth and efficient, minimizing downtime and enhancing productivity. Beyond its contract with Hadeed, PZC extends the same high-quality services to other industries, including cement, oil and gas, chemical, and glass sectors. Operating 24/7, PZC delivers reliable support through a combination of cutting-edge equipment and highly qualified teams, meeting the demanding needs of these industries with precision and professionalism.

# USED REFRACTORY MATERIAL RECYCLING

In response to global price increases and material shortages, Power Zone Contracting Co. has taken the initiative to address the environmental and economic challenges posed by refractory waste. Historically, refractory waste materials were discarded in local landfills, but the chemical elements in these materials have since become a worldwide concern. Recognizing this, Power Zone established a dedicated Refractory Waste Recycling Company in Saudi Arabia, offering sustainable solutions to various industries and generating significant cost savings.

Power Zone recycles refractory waste and converts it into valuable by-products and reusable materials for the steel, aluminum, cement, glass, and other industries utilizing refractory materials. With well-established operations in the Jubail and Dammam regions, Power Zone is staffed with highly qualified employees who undergo continuous training to keep pace with the evolving refractory materials industry.

At its recycling facilities, Power Zone segregates different waste materials to identify the best recycling solutions for each type. The company operates a range of specialized equipment, including crushing and screening plants, to process materials into powders, enhancing the recovery of valuable elements. The recycled materials are supplied to several refractory companies in Saudi Arabia, offering an economically viable alternative to rare materials while meeting international standards. Additionally, these recovered materials are used in steel plant production as additives for steelmaking, further reducing costs for the steel industry and minimizing landfill usage, making Power Zone's operations both cost-effective and environmentally responsible.

# TRANSPORTATION SERVICES

Power Zone Contracting Co. offers dependable and efficient road transport services, tailored to meet the diverse needs of our clients across various industries. With a fleet of well-maintained vehicles and skilled drivers, we specialize in the transportation of large volumes of materials via land routes. Whether transporting raw materials for manufacturing or finished products for distribution, we ensure timely deliveries while maintaining strict safety standards. Our comprehensive transport solutions include advanced route optimization, real-time tracking, and responsive customer support, ensuring that our clients receive continuous updates and peace of mind throughout the entire transportation process. With Power Zone's bulk road transport services, we guarantee the safe, efficient, and on-time delivery of cargo.

Power Zone's transport division provides expertise in the following specialized services:

- ✔ **Steel Slag Transportation**
- ✔ **By Product Materials Transportation**
- ✔ **Water Tanker Rental Services**
- ✔ **Flatbed Trailers for Transportation**
- ✔ **Lowbed Trailers supply for Heavy Logistics**

# RENTAL EQUIPMENT SERVICES

Power Zone Group offers a comprehensive range of equipment rental services, providing clients with access to high-quality industrial machinery without the need for significant capital investment.

- ✓ Excavators
- ✓ Compactors
- ✓ Dump Trucks
- ✓ Power Generators
- ✓ Front End Loaders
- ✓ Forklifts
- ✓ Air Compressors
- ✓ Bolt Torquing Equipment
- ✓ Backhoe Loaders
- ✓ Vacuum & Super-sucker Trucks
- ✓ Tower Lights
- ✓ Welding Machines
